

In the waters all around us...It's an....

ALIEN INVASION!

Please Protect Our Waters
Don't Release Exotics

**Don't let Aquatic Nuisance Species
take over our waters!**

What to do with an exotic: NEVER RELEASE IT!

If it's an unwanted pet, ask if your pet shop will accept it, or donate it to a school or aquarium.

If you caught it in the wild, first report it, then do as above, or euthanize it.

If it is a plant it should be destroyed (by burning if possible).

Visit our website at www.SWFWC.org/ANS to report an exotic
and for more information on how to slow the invasion.

ANS depicted on this poster:
Water Hyacinth, *Eichhornia crassipes*
Green Mussel, *Perna perna*
Red Swamp Crayfish, *Procambarus clarkii*
Spotted Apple Snail, *Pomacea maculata*
Hydrilla, *Hydrilla verticillata*
Sulfur Pearls, *Pterygoplichthys multiradiatus*
Oscar, *Astronotus ocellatus*
